

PROTOCOLS

In addition to our regular infection control procedures these are the following procedures that are being implemented:

- Touch free temperatures will be taken upon entry
- Patients must wear masks
- Reception room modifications- fewer people and escorts are discouraged
- Soap, faucets and hand sanitizers with touch free dispensing have been installed
- State of the art air filtration system has been installed.
- High tech high volume suction units have installed in operatories
- UV light for sterilization of all surfaces
- Entire staff are wearing the highest recommended N-95 masks, face shields, and head covers
